

Technical Safety Policy

Taking into consideration the safety and the good of our Customers and steady quality improvement of the service offered by ATM Przedsiębiorstwo Produkcyjne Ltd. (ATM PP Ltd.), the company has elaborated and implemented an integrated company's Technical Safety Policy.

The basic and the most important principle of the above mentioned Policy is to ensure our Customers that the company would not execute and confirm orders, when it is not clear that all technical, safety and quality requirements can be fulfilled by the company.

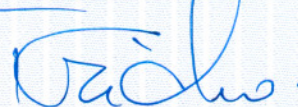

The Management of ATM PP Ltd. declares that all employees are familiar with Technical Safety Policy principles and that they are aware of the fact that a quality of their activity has a direct influence on a technical safety of a manufactured product.

Taking into consideration an achievement of above presented Technical Safety Policy principles; the company has determined the following Technical Safety Policy aims:

- acceptance and confirmation of the orders, which all technical and quality requirements specified by the Customer will be completely fulfilled
- rejection of orders which technical and quality requirements can not be completely fulfilled or it is a high probability that will not be completely fulfilled by the company, or the requirements are in contradiction with the mandatory technical standards and regulations concerning the subject product
- steady improvement of employees awareness that their activity influences on a technical safety of manufactured product.

The Management of ATM PP Ltd. declares that, the company's Technical Safety Policy has been presented to a company staff and that the principles of the Technical Safety Policy are periodically elaborated and verified. The Management is sure that execution of the presented Technical Safety Policy aims will cause a steady increase of our Customers satisfaction, and will help the company to gain new Customers and reinforce company's market and economical position.
